Software

SysSimExClusters: `https://github.com/ExoJulia/SysSimExClusters`

- Code for simulating planet catalogs from the "Clustered" models that are fit to the *Kepler* data
- Provides a branch for each of the three "Architectures of Exoplanetary Systems" papers (I, II, & III)
- Provides an online folder with a large collection of pre-simulated (physical and *Kepler*–observed) planet catalogs for download

ExoplanetsSysSim: `https://github.com/ExoJulia/ExoplanetsSysSim.jl`

- Core *SysSim* code
- Contributed to various elements to make it work with SysSimExClusters
